EXECUTIVE SUMMARY

Senior Fintech Product & Platform Leader with 15+ years of experience across financial markets, trading infrastructure, and regulatory-sensitive systems. Former Senior Product Manager at Zerodha, contributing to the scale and stability of high-volume trading platforms including Kite, Pi, and KiteConnect API. Deep expertise in market microstructure, API governance, system resilience, and compliance-aligned product design. Currently pursuing LL.B. to strengthen capabilities at the intersection of finance, technology, and regulatory frameworks. Known for structured thinking, risk-aware execution, and cross-functional leadership in mission-critical environments.

CORE COMPETENCIES

- Trading Platform & Market Infrastructure Leadership
 - API Governance & Ecosystem Strategy
 - Regulatory-Sensitive Product Design
 - Institutional Stakeholder Engagement
 - Risk & Compliance Alignment
 - Order Lifecycle & Execution Systems
 - Cross-Functional Team Leadership
 - High-Volume Fintech Operations
 - Financial Market Analysis & Microstructure
 - AI-Enabled Automation & Systems Thinking
-

PROFESSIONAL EXPERIENCE

Zerodha

Senior Product Manager | Trading Platforms & APIs

2014 – July 2025

Played a key leadership role in scaling and stabilizing India's largest retail trading ecosystem, supporting millions of active users across web, desktop, and API platforms.

Key Responsibilities & Contributions:

- Led product oversight across Kite (web/mobile), Zerodha Pi (desktop), and KiteConnect API.

- Coordinated engineering, QA, infrastructure, and operations teams to ensure zero-disruption releases during peak market volatility.
- Strengthened order lifecycle workflows, API governance frameworks, and production readiness processes.
- Contributed to platform resilience, latency optimization, and incident triaging during high-volume trading sessions.
- Collaborated with compliance and regulatory stakeholders to align platform behavior with SEBI and exchange norms.
- Mentored developers and ecosystem participants on API usage, algorithmic strategies, and system integration best practices.

Impact:

- Contributed to scaling trading infrastructure serving millions of retail participants.
 - Supported stability during extreme volatility events while maintaining operational integrity.
 - Strengthened API ecosystem adoption across retail and institutional developers.
-
